

Upgrade your Weather Station by exchanging the Data Logger

FREE UPGRADE KIT WHEN TRADING IN YOUR 3634 OR 3660 LOGGER*

Transform the weather station into a smart data hub with extended features, high speed output and full traceability.

3634/3660 Datalogger

- Aanderaa sensors only
- Slow serial output
- Limited bandwidth
- Limited resolution
- No traceability of data

SmartGuard Data Hub

- Ability to integrate all Aanderaa and 3rd party sensors over serial, digital (frequency pulse count) and analog interface
- LAN, serial and USB output directly via cable, AIS, VHF, GPRS etc
- Metadata stored and transmitted allowing full traceability of data origin and error checking
- Ability to act as a multiplexer and stream data from other instruments and loggers over same communication channel

* Upgrade kit with power converter and cable for converting mast cable to SmartGuard input
