

Aanderaa upcoming event - ENVRIplus 2017

ENVRIplus: 1st EU Environmental Research Infrastructures-Industry Joint Innovation Partnering Forum – 18-19 May, 2017

Location:

MINATEC, Grenoble, France

Members of the European Commission Horizon 2020 project ENVRIplus, will meet with Private Industry partners to explore opportunities for new joint innovation projects. The meeting, organized for the first time, will take place in Grenoble, France, from May 18-19, 2017.

Aanderaa will have a small booth at this meeting and has also been invited to give a keynote talk entitled: Development of optode sensor technology for oceanographic applications

Abstract: The introduction of oxygen optodes by Aanderaa more than 10 years ago created new possibilities in understanding oxygen dynamics in oceans and lakes. The technology and how it has evolved will be described. A range of scientifically oriented applications will be presented as well as methods on how to enhance data quality in the field. The difficulties and possibilities of similar optode technology to measure other parameters like pCO₂ and pH will also be discussed.
