

Aanderaa announces New Representation in the USA

Stratus Power Services, Inc. (SPS) to be the new distributor for the Mipeg product line

Bergen, Norway, July 8th, 2019-- Aanderaa Data Instruments AS announced today that it has signed a non-exclusive sales and service agreement with Stratus Power Services, Inc. who will continue to d/b/a MIPEG USA, covering Canada, USA and Mexico. The agreement was effective as of July 1st 2019.

"Aanderaa Data Instruments AS is pleased to announce this new partnership with Stratus Power Services, Inc.," said Mr. Harald Goldstein, Global Business Developer - Crane Products. "We are continually looking to meet the expectations of our customers, and with the dedicated resources and support provided by Stratus Power Services, Inc, I am confident that we will continue to deliver on our commitment with high quality and strong customer focus."

"For the past 18 years, the Mipeg product line has been promoted and supported by Mr. Tom Rogan. Mr. Rogan has during this time been a dedicated Mipeg representor and for the last 8 years worked through his own company Rogan Resources LLC together with his partner Mary Rogan. Aanderaa Data Instruments AS is grateful for all the valued work and commitment made to secure the existing market position and customer base. We wish Tom and Mary a happy retirement," added Mr. Goldstein.

About Stratus Power Services, Inc.

Stratus Power Services, Inc. (SPS) has a knowledgeable staff with a combined experience of over 125 years in oilfield electrical parts and service. Their services range from engineering to commissioning and everything in-between. "We are extremely honored to have been chosen as the distributor for the Mipeg systems. As the new distributor for Mipeg USA we look forward to supporting all existing systems, as well as providing new systems and services," said Randy Adams, Vice President of Stratus Power Services, Inc. SPS has a field service group that will be fully trained on the Mipeg 2000 as well as the Mipeg X to assist with any onboard issues that may arise.
